

Hello Rose

Just wanted to send you an email to thank you for the talk, you have inspired me. I am very grateful I had the opportunity to talk to you. I hope that someday we will meet up again and I get angel readings, healing, etc. done through you. You have a wonderful personality and I would like to talk again someday. Hopefully the transition I am going through will be accomplished.

I am so thrilled to know you have had the opportunity to meet Doreen Virtue and learnt from her. I have been educating my friends about Doreen Virtue's books. I have bought my close friends the book "Angels 101". My spirits have told me that I am to teach. So, I felt that if I get my friends started with Doreen Virtue that they too will continue to educate themselves and find their path. I work 7 days a week, at two different jobs and I have passed on the little things to my co-workers who believe the same things. I started them off with the God Box. I could see in their eyes the excitement of beginning the journey. Another friend I have helped her understand what she is experiencing and she is also reading Doreen Virtue.

Thank you once again, and you continue with the wonderful journey you have found. I hope someday I will be able to go to seminars and learn the greatest gift we had been given.
